

Important note:

1. BEA Union Investment Asian Bond and Currency Fund (the "Fund") seeks regular interest income, capital gains and currency appreciation from an actively managed portfolio primarily investing in debt securities denominated in Asian or other currencies and primarily issued by Asian government or corporate entities.
2. The Fund is subject to general investment risk, Asian market concentration risk, emerging market risk and currency risk.
3. The Fund invests in debt securities and is subject to risks in interest rates, credit/counterparty, downgrading, below investment grade and non-rated securities, volatility and liquidity, valuation and sovereign debt and credit rating which may adversely affect the price of the debt securities.
4. The manager may at its discretion make distributions from income and/or capital in respect of the distributing classes of the Fund. Distributions paid out of capital amount to a return or withdrawal of part of the unitholder's original investment or from any capital gains attributable to that original investment. Such distribution may result in an immediate reduction of the net asset value per unit.
5. In terms of currency hedged class units, adverse exchange rate fluctuations between the base currency of the Fund and the class currency of the currency hedged class units may result in a decrease in return and/or loss of capital for unitholders. Over-hedged or under-hedged positions may arise, and there can be no assurance that the currency hedged class units will be hedged at all times or that the manager will be successful in employing the hedge.
6. RMB is currently not a freely convertible currency as it is subject to exchange controls and restrictions. Non-RMB based (e.g. Hong Kong) investors are exposed to foreign exchange risk, and there is no guarantee that the value of RMB against the investors' base currencies (for example HKD) will not depreciate. Any depreciation of the RMB could adversely affect the value of investors' investments.
7. The Fund may use financial derivative instruments for hedging and investment purposes which may not achieve the intended purpose and may result in significant losses. Risks associated with derivative instruments include counterparty/ credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk.
8. Investors should not make an investment decision based solely on this material.

Trusted Asia Manager with Global Values

BEA Union Investment

Asian Bond and Currency Fund ("ABC")

+ ©2022 Morningstar. Data as of 31 August 2022. The rating is for Class A USD (Accumulating) and is for reference only and should not be construed as buy and sell recommendation of investment. Past performance: 2021: -8.6%; 2020: -0.4%; 2019: 10.0%; 2018: -2.4%; 2017: 8.2%; YTD (31 August 2022): -10.8%. Performance is calculated in Class A USD (Accumulating) of the Fund on a NAV to NAV basis. Gross income is re-invested.

1. Source: BEA Union Investment. The mentioned dividend yield is for Class A USD (Distributing), and is the sum of the monthly annualized dividend yield for the past 60 months, from September 2017 to August 2022 (60 dividends), divided by 60. Annualised dividend yield = (dividend of the current month x 12) / last month end NAV x 100%. Please refer to the dividend notice available on website for dividend composition information and details. Dividend only applies to distributing classes and is not guaranteed. Past dividend record is not indicative of future dividend likely to be achieved. Please note that a positive distribution yield does not imply a positive return. Investors should note that the distributions paid out of capital amount to a return or withdrawal of part of the unitholder's original investment or from any capital gains attributable to that original investment. Such distribution may result in an immediate reduction of the net asset value per unit.

The Fund aims to seek regular interest income, capital growth and currency appreciation through investing in Asia bonds. With the flexible approach, the allocation of high yield bonds and investment grade bonds will be actively managed according to the market conditions.

As one of the pioneer fund amongst the Asia high yield bond peers, the investment team has proven track record since 2008.

Achieved an annualised return of 5.2%⁸ since launched 13 years ago.

Since 2017, the fund has distributed dividend every month (aim to provide monthly dividends, dividends are not guaranteed, and distributions may be paid out of income and/or capital) and provided the average annualised dividend yield of 6%¹.

While focusing on Asia high yield bonds to generate alpha, the investment team also actively adjusts the allocation of investment grade bonds for risk diversification.
